

bibliotecha

Access to all
knowledge at the
touch of a button.

Knowledge has always meant power but in the Digital Age this correlation has grown to new extremes. Many of the biggest inequalities in today's world are attributable to limited access of information. The world's entire scientific and cultural heritage, published over centuries in books and journals, is increasingly being digitized and locked up by a handful of private corporations like Amazon.

Bibliotecha is an underground, local, and offline digital network for the distribution of electronic publications within WDKA. By sharing your academic publications we can together create a cloud of knowledge, free for all to access. This poster is part of The Material is the Message series. *"The material is always more resilient than the virtual"* - Henry Warwick.
